

# Infinity Retail Management System for Grocery

## Business challenges

- High transaction volumes
- Large numbers of customers in-store at any one time
- Need to track and manage cash by operator
- Regular promotions and price changes
- Vast and diverse product range

*"With Infinity we have happier customers because we can deal with them quickly at the checkout and get them on their way much quicker,"*

Ruben Perez, Figuero Produce Market

## Features

- Efficient workflow and simple interface require very little operator training and ensure transactions are fast, minimizing queues
- Hot keys allow common open department items to appear on the main screen for one-touch entry into a transaction
- Customizable sets of drilldown menus allow easy grouping and identification of products
- Shelf labeling can be used to automatically update and print accurate labels as prices change
- Mobile price verification
- Alternate barcodes can be assigned to products. These can be used to assign RFID codes to products for fast scanning or theft prevention
- Advanced cash management option allows tracking of each cash float as it is assigned to a user or station, ensuring accountability by the user until the float is returned at the end of each shift
- Scale integration, includes compatibility with industry leading hardware
- Variable barcode support for scanning of produce.
- Branch specific pricing means pricing can be set to reflect the type and location of individual stores within the group
- Support for tender by food stamps and WIC
